Dear Jeff Brindle -

Many thanks to you and your staff and students for giving us such a wonderful afternoon visit to the dear old school. It was absolutely delightful. We were made so welcome and everyone was so interested in our stories.

Thankyou to the lovely girls I sat with at tea - Millicent in her first year and the two who were going to Air Cadets after our meeting and hoped to become engineers in the R.A.F. I hope they achieve such a worthwhile occupation. Aspiration indeed!

2.

The tour of a small part of the school was an eye opener. What wonderful rooms in the Technical block and what a wealth of talented people had produced the pictures in the Art Room and the work in textiles where we were lucky enough to meet "Miss".

Thankyou so much to the students who guided us including the one whose form-room was the "old" science lab. Not quite like like the chemistry lab I knew in the top right hand corner of the back of the original school!

As you can see my head is

3.

Still buzzing with it all.

Very best wishes for the
School's future. I feel very
proud to have once been
part of it.

Barbara Tricker
née Ward.

P.S. The booklets are a great
memento. There is an
article by my brother
Michael - who was also on
the train but is now in
Australia.

But - amazingly - the
girl on the river bank at
Bewdley is Beth Blowers
who was with us that day!
BMT.
