Higher Expectations, Raising Aspirations

Friday, 18th December 2020

Dear parent/carer

Year 7 Set Changes

I am writing to advise you of some set changes in January 2021 to the year 7 teaching groups. Class groupings will be either based upon their form group or their maths set.

Up until this point, all year 7 students have been taught within their form groups. From January students will have the same form groups and will attend form as normal in the morning, but will then move on to be taught either within their form group or within their maths set grouping across their subjects. Each subject has made this decision based on what will give the students the most positive experience in the classroom and allow for further differentiation and challenge within the lessons.

Since returning in September, students have responded incredibly well to the changes within school and had a very positive approach to their learning. The aim of the set changes is to enhance students' engagement and learning experience across all of their subjects.

To ensure that the booking of appointments for our online Parents' Evening on Thursday, 7th January, is as smooth as possible, the changes will be implemented from Monday, 11th January.

Please let your child know that they will still be within their already established friendship bubbles.

Thank you for all of your ongoing support throughout this term and best wishes for Christmas and the new year.

Yours sincerely

Mr A Martin
Assistant Headteacher
